WORLDKYC

WorldKYC is an integrated risk classification technology for new and existing customers. Transparency at its finest. They believe that knowing your customers is not an option. They are currently based in Hong Kong with a great team in place.

What **WorldKYC** offers:

- Flexible integration with existing customer acceptance processes.
- Compliance with statutory due diligence for risk-based customer acceptance.
- Designer to create dynamic customer acceptance questionnaires.
- Customer information is matched with the sanction and watch lists to identify criminals, and with PEP databases.
- Automatic retrieval of the beneficial owner for legal entities.

WinstantPay was formed to provide a global network for instant settlement of payments in any currency, anywhere, and anytime. It has the power of SWIFT, Western Union, and Visa / Mastercard without the overhead and at lower fees, while still complying to Know Your Customer (KYC) and Anti-Money Laundering (AML) regulations.

What **WinstantPay** offers:

- An instant exchange between digital currencies, including crypto and fiat currencies
- Instant global and local payments facilitated by various means, including QR codes, NFC and messaging
- Merchant solutions for accelerating sales, paying suppliers, receiving payments
- A Correspondent network of banks and financial institutions

Kim Funtez Head of Marketing and Business Development of OKEX

StemFlux aims to seek solutions to common and compounded medical conditions with cellular dynamics as a key to tuning function down to the epigenetic level of the cell nucleus. Cells used for a quantum cellular healing effect that in-kind balances organ function, using cellular chemotactic and homeostatic signals to unravel the mysteries of increasing that rate of cellular healing, organ function and to reduce aging.

What **StemFlux** offers:

- Reverse the progression of diseases.
- Promote cellular repair and regeneration.
- Improve patient health and body function
- Reduce medical costs for patients, institutions, and governments.

- Becoming “treatment of choice” for patients with terminal and chronic diseases.

DIC | InDex Chain launched by the HephZibah Foundation in Singapore, InDex's mission is to establish a next-generation decentralized open financial infrastructure for DeFi market participants. Built for decentralized financial service providers, DeFi projects, distributed application services and ecosystems.

What **InDex** offers:

- **InDex** is an open, combinable, intelligent multi-chain platform.
- DIC, used to pay for transaction costs. At the same time, all digital tokens issued on InDex can be exchanged and traded seamlessly using DIC as a carrier through atomic swap technology.
- The SuperNode operator mortgages DIC and helps InDex build and maintain a decentralized blockchain network that earns equity revenue by running nodes and verifying chain communication.

- DIC is your vote, participate in voting and express your opinion on how the InDex network should operate. Implementing DIC holders' community governance of the network is the core goal of InDex.
- Any service provider in the network can accept DIC as a settlement method. Node build providers, auditors, licensors, marketing agencies, developers, and any other network participants can choose to accept DIC in exchange for their services.
